| <b>UTAA Credit (Theoretical-Laboratory hours/week):</b> | 0(0-0)                                  |
| <b>ECTS Credit:</b>                                     | 12                                      |
| <b>Department:</b>                                      | Mechanical and Aeronautical Engineering |
| <b>Language of Instruction:</b>                         | English                                 |
| <b>Level of Study:</b>                                  | Graduate                                |
| <b>Offered Semester:</b>                                | Fall and Spring Semesters.              |

## Course Objectives

The goal of this course is - To advance students technical skills in preparing and giving seminars. - To let students share their latest findings on research and prepare the academic discussion environment for proper feedback receiving.

## Course Content

Various research topics in mechanical and aeronautical engineering.

## Course Learning Outcomes

- 1-Students will be able to make proposals about an academic subjects
- 2-Students will be able to make multidisciplinary research.
- 3-Students will be able to report their preparations and researches.
- 4-Students will gain experience by seeing and trying to in front of the community to share knowledge
- 5-Students will develop their written and oral communication skills.
